## PAST EXPERIENCE

### ELYSIUM INTELLIGENCE AND BUSINESS SOLUTIONS|FLUTTER DEVELOPER(FRONTEND)

NOV 2024 -JAN 2025| Madurai (ONSITE)

- I am working in this company as a Flutter developer for the past two months.
- **Fist Mart**: converted a Figma to working UI for a local online fish market delivery app that enabling seamless delivery services using GetX.
- **Agriiot**: Played an integral role in the agriiot project, which focuses on digitalizing farming using IOT technologies.
- **Backend Development**: Designed and developed the backend for agriiot using Django, ensuring API calls and efficient system functionality.

## ACHIEVMENTS

### GOOGLE DEVELOPER GROUPS - COIMBATORE | HACKATHON

JULY 2023 | COIMBATORE

I participated in this hackathon for present a project that I have developed using ARCGIS for the development of the city in presence of the police department to Coimbatore. This is an Open Competition that encourages people from any age group for participation. I presented my project named "**GOVT ASSET MANAGEMENT WEB APPLICATION**".

## COURSEWORK

### POSTGRADUATE:

### RESULT APP FOR COLLEGE

FEB 2024 – MAR 2024 | COIMBATORE

- This is my final end-semester submission.
- The application features result declaration, result management, and personal student records for easy student profiling on campus.
- This application is developed using Flutter for the frontend, MongoDB for the database, and React for the admin dashboard (or any other specific use of React, depending on your implementation).

## PROJECT WORK

### HOTEL APP UI

- **Login UI**: Designed a clean login/signup screen using Firebase Authentication.
- **Chat UI**: Built a chat interface with message bubbles, input field, and send button.
- **Real-Time Chat**: Integrated Firestore for sending/receiving messages in real-time.
- **Basic Features**: Enabled text messaging and displayed chat history.
- **Simple & Functional**: Focused on a minimal, user-friendly design for seamless chatting.
